ABOUT ME

Dedicated and results-driven software engineer with over 3 years of experience in full-stack development. I am passionate about leveraging my technical skills to create innovative and efficient solutions that address complex business challenges. With a solid foundation in software architecture and a keen eye for detail, I excel in translating client requirements into high-quality, user-friendly applications

WORK EXPERIENCE

SOFTWARE ENGINEER (REMOTE)
Hotcat Technology [Feb 2022 – Current]

City: colombo
Country: Sri Lanka

-Spearheaded the back-end development of account management systems for John Keels in Sri Lanka.
-Utilized Laravel, MySQL, and AWS technologies to ensure robust and scalable solutions.
-Collaborated closely with a team of two, managing effective communication and streamlining Git processes.
-Played a pivotal role in ensuring the seamless integration of back-end components into the overall system architecture.
-Successfully delivered high-quality code within project timelines, contributing to overall project success.
-Independently developed a standalone Stock Management
-System for Abeyrathne Enterprise using Java and MySQL.
-Completed the entire project lifecycle, from requirements gathering to implementation.
-Leading the development of a Dental Clinic Management
-System, utilizing Spring Boot and MySQL to create a robust backend infrastructure.
-Adhering to strict client requirements and maintaining a high level of focus.
-Continuously improving focus and problem-solving skills through ongoing project work

ASSOCIATE SOFTWARE ENGINEER
Hotcat Technology [Aug 2021 – Feb 2022]

City: Colombo

Country: Sri Lanka

-Contributed as a front-end developer for the insurance system outsourcing project for Sri Lanka's largest group company, John Keells.
-Streamlined the insurance process, allowing customers to input basic details and receive customized insurance plan recommendations.
-Utilized Redux, ReactJS, and Axios for front-end development, adapting to high standards and incorporating UI changes.
-Demonstrated patience in adapting to UI modifications and implemented various complex functions.
-Enhanced thinking and mathematical skills through the calculation of multiple functions for accurate outputs.
-Worked as a backend developer for the Tuition Class web application, developing features for fee payments and attendance management.
-Implemented an admin panel for teachers and a website for students using Node.js, MongoDB, and AWS EC2 for backend operations.

Intern Software Engineer
Hotcat Technology [Feb 2021 – Aug 2021]

City: Colombo
Country: Spain

-Engaged in front-end development projects, contributing to the enhancement of coding standards.
-Demonstrated proficiency in Vue.js for the front-end development of energy plant management systems for
-Azbil Corporation in Japan.
-Solely responsible for the entire front-end development, implementing Axios for effective API connectivity.
-Maintained high coding standards through continuous monitoring and personal improvement.
-Contributed to the development of a communication app for developers at Hotcat Technologies using React
-Native and Redux technologies.
-Incorporated Axios for seamless API calls and facilitated collaborative problem-solving among developers.
