

ISHAN HIMALKA

Full-Stack Software Engineer

+34 603 41 04 64 | ishanhimalkaive@gmail.com | linkedin.com/in/ishan-himalka-7b6678196 | Madrid, Spain

SUMMARY

Full-stack engineer with 4+ years building and shipping production web and mobile applications, spanning React/Vue frontends, Flutter/React Native apps, and Java/Spring Boot and Node.js backends. Comfortable owning a feature end to end — UI, API, database, and deployment. Currently building a cross-platform trading app and leading CI/CD delivery at LYXUX Global (Madrid).

EDUCATION

BSc (Hons) Computer Science — The University of Bolton2024 – 2025

Top-up degree (part-time, completed alongside full-time employment)

Graduate Diploma in Software Engineering — IJSE (Institute of Software Engineering)2019 – 2022

EXPERIENCE

Software Engineer | LYXUX Global S.L, Madrid, Spain2024 – Present

- Impulse Trade: built a cross-platform trading application end to end, developing the Flutter frontend and Python backend with real-time market data feed integration, from architecture through release.
- Set up a CI/CD pipeline with GitHub Actions, cutting the build-to-deployment process from a manual multi-step task to a single automated push-to-release flow.
- Introduced automated test coverage with PyTest and Cypress across backend and frontend layers, catching regressions before release and reducing post-release bug reports.
- Run Scrum ceremonies and manage the team backlog in Jira, coordinating delivery across two-week sprints for a team of 6.
- Established a Git-based branching strategy with mandatory PR reviews, keeping the codebase stable across contributors and reducing regressions reaching production.

Software Engineer (Remote) | Hotcat Technology2022 – 2024

Colombo, Sri Lanka → Madrid, Spain (relocated Mar 2023)

- Designed and built a Stock Management System in Java/Spring Boot and MySQL, improving inventory tracking accuracy and cutting manual stock-reconciliation time for the business.
- Optimized MySQL queries and indexing strategy across the enterprise account management system, improving average API response times.
- Containerized services with Docker and deployed them on AWS EC2, improving deployment consistency and cutting environment-related bugs across dev/staging/prod.
- Led backend architecture for the Dental Clinic Management System in Spring Boot, following Agile/Scrum workflows tracked in Jira.
- Implemented JWT-based authentication and role-based access control across all RESTful endpoints, closing gaps in endpoint-level authorization.

Intern Software Engineer | Hotcat Technology, Colombo, Sri Lanka2021 – 2022

- Built frontend modules in Vue.js for an industrial energy management platform, collaborating in Git-based workflows with senior engineers.
- Developed mobile communication features in React Native/Redux, writing unit tests to validate behavior before each release.

SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL

Frontend & Mobile: React.js, Next.js, Redux, Vue.js, React Native, Flutter

Backend: Spring Boot, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD (GitHub Actions), Git

Practices: Agile/Scrum, Jira, Automated Testing (PyTest, Cypress)

OUTSIDE OF WORK

Building DisciplineLife — a personal fintech + habit-tracking mobile app (React Native, Firebase). Active in Madrid's tech meetup community.
